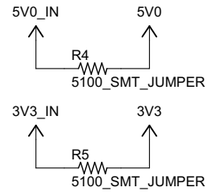
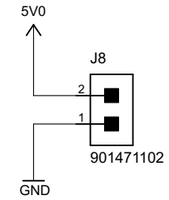
POWER IN JUMPERS



Metal jumpers; Place at least 75mil apart

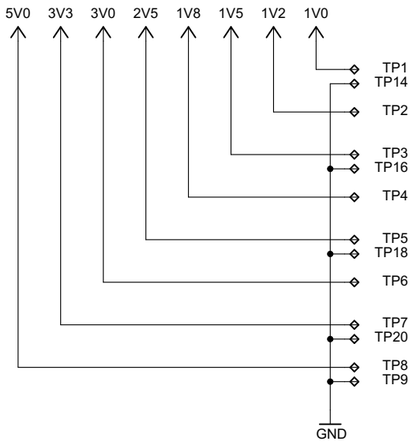
5V HEADER

Use 5V Header (J8) to supply 5V power to devices



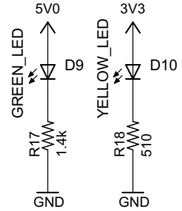
5V Header Total Current Limit: 100mA @ 5V

POWER PROBE TESTPOINTS

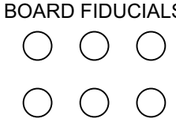


Place ground testpoint next to each rail testpoint
(except where a common ground pad can be shared)

POWER LEDs



BOARD FIDUCIALS



Note: Shield power limits assume all header current limits are used and a Mini-PCIe Gen1 card (i.e. Wi-Fi) is connected.

It is assumed that additional shields or USB devices are not connected to the Galileo; please use at your own risk.
